## Your New Hygiene Experience at Oakmead Dental Care

Exciting News! Elevate Your Dental Hygiene Experience with EMS GBT!

Dear Valued patients,

We're thrilled to announce an exciting upgrade to our hygiene appointments at Oakmead Dental Care! Starting on Monday, 2nd June, we will be introducing the revolutionary EMS Guided Biofilm Therapy (GBT) system to all our dental hygiene treatments.

Experience the Future of Dental Hygiene – A Spa Day for Your Mouth!

- EMS GBT is a state-of-the-art approach to dental hygiene that offers a truly exceptional and comfortable experience. We're confident you'll love the benefits, which include:
  - A Spa-Like Treatment: GBT focuses on a gentle yet highly effective cleaning process, making your hygiene appointment feel more like a refreshing spa treatment for your mouth.
  - Warm Water Comfort: The system utilizes warm water, making it incredibly comfortable, even for those with the most sensitive teeth. Say goodbye to cold water discomfort!
  - Gentle and Minimally Invasive: GBT is designed to be gentle on your teeth and gums, providing a thorough clean without the discomfort sometimes associated with traditional methods.
  - Highly Effective Biofilm Removal: Guided Biofilm Therapy targets and removes dental biofilm (the main cause of cavities, gum disease, and bad breath) with remarkable precision.
  - Stain Removal: Enjoy a brighter, fresher smile as GBT effectively removes stains, leaving your teeth feeling smooth and looking their best.

### How Does EMS GBT Work?

EMS GBT is a systematic, predictable treatment protocol. It typically involves:

- Assessment and Disclosure: We'll first assess your oral health and use a disclosing solution to make biofilm visible. This allows us to show you the areas that need attention and ensures targeted cleaning.
- AirFlow® Therapy: This step uses a gentle stream of warm water, air, and fine powder to remove biofilm and young calculus from your teeth, around braces, and even from implants and restorations.
- PerioFlow® Therapy: If needed, this specialized nozzle gently and effectively removes biofilm from deeper periodontal pockets.
- Piezon® No Pain Technology: If any hard calculus (tartar) remains, we use the ultrasonic Piezon® scaler with warm water for comfortable and precise removal.
- Final Check and Recall: We ensure your mouth feels exceptionally clean and discuss your ongoing oral health needs.

## Try EMS GBT at No Additional Charge!

We're so excited for you to experience the difference of EMS GBT that we're offering a special introductory period. From the 27th May to the 22nd of June, all hygiene appointments will include the new EMS GBT method at no additional charge to your usual hygiene fee. This is a fantastic opportunity to experience this advanced treatment firsthand!

All hygiene appointments will be priced at £95 from the 23rd of June. We believe this represents excellent value for an incredible hygiene experience and the long-term benefits it provides for your oral health.

We are committed to investing in the latest technology to provide you with the highest standard of dental care. We can't wait for you to experience the exceptional clean and comfort of EMS GBT. If you want to find out more please follow this link.
